MODEL 110-LBD-3

The model 110-LBD-3 interactive light box display provides a light weight easy to transport and setup solution for any event. This educational light box allows the user to try turning on different types of light bulbs while looking at real-time power meter data showing Volts, Amps, Watts and Watt Hours.

POWER METER

The power meter shows Volts, Amps, Watts, and Watt hours. This box can be configured to have 3 separate power meters one for each bulb, or just one meter for all three bulbs.
